

RoHS Compliance Certificate

This certificate serves as notification that the supplied DEVA Broadcast Ltd. product is compliant with the related Directive 2015/863/EU on the Restriction of the use of certain Hazardous Substances in electrical and electronic equipment (RoHS).

As a company, DEVA Broadcast Ltd. actively embraces its environmental obligations outlined by the RoHS directives.

DEVA Broadcast Ltd. has phased out the use of certain hazardous substances identified in the European Union's Restriction of Hazardous Substances (RoHS) directive. The RoHS directive limits the use of certain hazardous substances currently used in EEE manufacture, including lead, mercury, cadmium, hexavalent chromium, and halide-containing compounds PBB (polybrominated biphenyl) and PBDE (polybrominated diphenyl ether). Elimination of these substances results in more environmentally friendly recycling of electronic equipment. For the products which DEVA Broadcast Ltd. manufactures, the main area where products were affected was in the use of lead for manufacturing and assembling electronics circuit boards.

DEVA Broadcast Ltd. practices lead-free (LF) manufacturing processes. LF solder is used on the surface-mount PCB manufacturing processes and also for hand soldering. The printed circuit boards (PCBs) used are either gold plated, or immersion tin plated, both of which use no lead.

If you have any questions regarding our processes and/or the above statement, please feel free to email us at info@devabroadcast.com
